Aspiring computational biologist with strong interests in big data, disease evolution and genomics, teaching, and open source code/science

Education

2017 **B.A., Biology**, *Swarthmore College*, Swarthmore, PA.

Experience

2017–Present **Chan Zuckerberg Biohub**, *Spyros Darmanis Laboratory*, San Francisco, CA, Research Associate II.

Investigated large biological datasets with a variety of tools including Docker, Python (**pandas**, **SciPy**, **Matplotlib**, **scikit-learn**), AWS, and workflow management systems such as Reflow. Worked as part of a collaborative team in a fast-paced, cutting-edge scientific environment.

Projects:

- Built a software tool for fast and memory-efficient summarizing of vcf (variant calling format) file entries following a sequencing experiment (<https://github.com/czbiohub/cerebra>)
- Identified mutations in single-cell RNA-seq patient samples as part of a larger effort to better characterize changes in the lung tumor microenvironment across disease progression. In collaboration with the Bivona lab of UCSF, manuscript submitted to *Cell*
- Investigated the gene expression and alternate splicing dynamics of neuroendocrine cells in the developing lung, in collaboration with the Christin Kuo lab of Stanford

2016–2017 **Brad Davidson Laboratory**, *Swarthmore College Biology Department*, Swarthmore, PA, Computational Biology Research Assistant.

Assembled the genome and embryonic transcriptome of *Corella Inflata* (sea squirt). Helped construct an improved phylogenetic tree for the *Tunicate* subphylum, in collaboration with the Joe Ryan Lab of the University of Florida Whitney Marine Station

Research Training

2015–2016 **Nick Kaplinsky Laboratory**, *Swarthmore College*, Swarthmore, PA.

Developed web-based pipelines for differential gene expression tests in RNA-seq samples

2013–2014 **Evan Vosburgh Laboratory**, *Cancer Institute of New Jersey*, New Brunswick, NJ.

Investigated the effects of several cancer drugs on expression of key oncogenes in cell culture.

Honors and Awards

2019 NSF Graduate Research Fellowship Program – *Applicant*

Publications

Articles

- [1] Maynard A, McCoach C, Rotow J*, **Harris L***, Darmanis S, Blakely C, Bivona T, et al. Heterogeneity and targeted therapy-induced adaptations in lung cancer revealed by single-cell RNA-seq. *submitted to Cell*, 2019.
*These authors contributed equally to this work.
- [2] DeBiasse M, Colgan W, **Harris L**, Ryan J, and Davidson B. The genome of *Corella inflata* and phylogeny of Tunicata. *submitted to Molecular Biology and Evolution*, 2019.
- [3] Schaum N, **The Tabula Muris Consortium**, et al. The murine transcriptome reveals global aging nodes with organ-specific phase and amplitude. *bioRxiv*, 2019.
- [4] **Harris L**, Vanheusden R, and Darmanis S. Cerebra: a tool for high-throughput variant call processing. *manuscript in preparation*, 2019.
- [5] **The Tabula Muris Consortium** et al. A single cell transcriptomic atlas characterizes aging tissues in the mouse. *bioRxiv*, 2019.

Conference Posters

- [1] **Harris L**, Maynard A, McCoach C, Rotow J, , Darmanis S, Blakely C, Bivona T, et al. Single-cell characterization of the tumor microenvironment in advanced stage Lung Adenocarcinoma. In *Chan Zuckerberg Biohub Inter-lab Confab*, San Francisco, CA, October 2018.
- [2] **Harris L**, Schug J, Kaplinsky N, and Davidson B. Towards an assembled genome and transcriptome of *Corella Inflata*. In *Sigma Xi National Honor Society Student Research Showcase*, Swarthmore, PA, October 2016.
- [3] **Harris L**, Vanheusden R, and Darmanis S. Cerebra: a new tool for high-throughput variant call processing. In *Algorithms and models for Single-cell genomics*, Irvine, CA, June 2019.

Talks

* indicates invited talk

- 2019 **New methods for high-throughput variant call processing**, *Chan Zuckerberg Biohub Interlab Confab*, San Francisco, CA.
- 2019 **New methods for high-throughput variant call processing**, *Beyond the Cell Atlas Conference*, Berkeley, CA*.
- 2018 **Single-cell characterization of cancer hallmarks in advanced stage Lung Adenocarcinoma**, *Chan Zuckerberg Biohub Internal Seminar Series*, San Francisco, CA.
- 2017 **The genome and embryonic transcriptome of *Corella Inflata***, *Undergraduate Biology Department Research Symposium*, Swarthmore College, Swarthmore, PA.

Software

- cerebra** Performs high-throughput summarizing of vcf entries following a sequencing experiment.
<https://github.com/czbiohub/cerebra> (19 stars on GitHub)
- motifScan** Scans an enhancer region for putative transcription factor binding sites.
<https://github.com/lincoln-harris/motifScan>

Teaching, Leadership and Interests

- 2017–2019 **Instructor**, *Cupcakes and Coding*, Chan Zuckerberg Biohub, San Francisco, CA.
Volunteered as an instructor at weekly beginner-friendly coding sessions
- 2016–2017 **Co-host**, *WSRN Radio Station*, Swarthmore, PA.
Co-hosted a popular weekly radio program for two semesters
- 2016–2017 **Volunteer Instructor**, *Youth Swim Lessons*, Swarthmore, PA.
Taught bi-weekly swim lessons for children ages 5-12
- 2016 **Student teacher**, *Swarthmore Rutledge Elementary School*, Swarthmore, PA.
Taught science lessons for 5th grade students at a local elementary school
- 2013–2017 **Member**, *Swarthmore College Swim Team*, Swarthmore, PA.
Participated as a four-year varsity member on a Division III swim team
- 2012–2013 **Captain**, *South Brunswick High School Swim Team*, South Brunswick, NJ.
Lead varsity team to a dual-meet record of 6-4

Mentees

- 2019 **Rohan Vanheusden**, *Nueva High School*, San Mateo, CA, High School Student.
Mentored a local high school student with strong interests in computational biology for 11 weeks.
